Re: IPO Counts and Selections

Date: 20140309

Using data mostly from the SEC (Edgar) along with comparison data from Yahoo! IPOs, SDC Thomson, Hoovers, and other sources, including many of the corrections posted by Jay Ritter on his website, data on IPO types from 1998-2013 are shown. The numbers are very close to Jay Ritter's, but differ mostly because he groups some data items (e.g., unit issues and penny issues). Here, if a deal is, for example, a unit issue, limited partnership, SPAC firm, it is listed in all three categories. However, we exclude the same deal types and both methods lead to similar Gross and Net IPO counts.

Boeh – IPO Selections and Counts

YEAR	Gross IPOs	Net IPOs	Closed End funds	Investment Trusts	REITs	SPACs	Penny Stocks	ADR or ADS	LPs	Unit Issues	Non-US or OTC	Shr BenInt EIS,EDS	Banks S&Ls
